ABSTRACT

This study analyzes listed companies with reduced capital and cross-compares them with listed companies that have reduced their capital by using statistical data. Analyze the advantages and disadvantages of its operating efficiency, and analyze and observe the operating performance of listed listed stock companies with capital reduction before and after capital reduction from the perspective of macro economic environment with diversified economic indicators, and the performance analysis of stock price response in the securities market. Then, based on the data displayed, we perform an analysis of the stock company after the capital reduction, and show the performance of the company's management. At the same time, it provides investors with reference analysis research data on the performance of the stock investment market of listed listed stock companies with capital reduction. This study finds the changes in the impact of stock prices before and after the capital reduction, and provides a reference for operators to carry out the consequences of capital reduction. If investors are involved in the capital reduction stock, they should invest in risk management and control, and provide various indicators of the previously listed listed stock reduction company for reference and evaluation.

Keywords: Before Capital Reduction, After Capital Reduction, Business Performance, Listed Companies, Economic Indicators, Strial Management
